

Jacquard Weaver - Handloom (TSC/Q7306)

Multiple Choice Questions

1. Which part of the Jacquard machine controls the lifting of warp threads?

- A. Shuttle
- B. Reed
- C. Hooks and harness cords
- D. Bobbin

2. In handloom weaving, warp threads run:

- A. Across the width of the fabric
- B. Vertically along the length of the fabric
- C. Diagonally across the fabric
- D. Randomly through the fabric

3. Which material is commonly used for weaving on a Jacquard handloom?

- A. Cotton
- B. Silk
- C. Wool
- D. All of the above

4. What should a weaver check before starting the loom?

- A. Yarn tension
- B. Cleanliness of the machine
- C. Correct card lacing
- D. All of the above

5. The reed in a loom is mainly used for:

- A. Dyeing yarn
- B. Beating the weft into place
- C. Spinning yarn
- D. Cutting fabric

6. What is the function of heddles in weaving?

- A. Holding the warp yarns
- B. Rolling the fabric
- C. Measuring the cloth
- D. Winding the shuttle

7. Which safety practice is important while operating a Jacquard loom?

- A. Wearing loose clothing
- B. Ignoring moving parts
- C. Keeping hands away from moving mechanisms
- D. Running the loom without inspection

8. What is the role of a dobby or Jacquard attachment?

- A. Yarn dyeing
- B. Pattern formation
- C. Fabric cutting
- D. Yarn twisting

9. Which tool is commonly used to repair broken warp threads?

- A. Scissors
- B. Knotting hook
- C. Shuttle
- D. Beam stand

10. Which factor directly affects fabric quality?

- A. Yarn count
- B. Tension control
- C. Correct weaving pattern
- D. All of the above

11. Why is regular cleaning of the loom necessary?

- A. To improve fabric quality
- B. To reduce machine wear
- C. To ensure smooth operation
- D. All of the above

12. Which of the following is a common woven design produced using Jacquard weaving?

- A. Floral motifs
- B. Plain knit
- C. Non-woven sheets
- D. Rubber coating

13. What should be done if unusual noise is heard from the loom?

- A. Increase loom speed
- B. Ignore the sound
- C. Stop the loom and inspect
- D. Continue weaving

14. Which type of yarn is generally preferred for high-quality Jacquard fabrics?

- A. Weak yarn
- B. Uniform and strong yarn
- C. Damaged yarn
- D. Thick rope yarn

15. What is the purpose of fabric inspection after weaving?

- A. To identify defects
- B. To increase machine speed
- C. To dye the fabric
- D. To change the design

16. Which personal protective equipment (PPE) is useful in a weaving unit?

- A. Gloves and mask
- B. Helmet only
- C. Raincoat
- D. Sandals

17. In Jacquard weaving, each hook generally controls:

- A. One warp thread or group of threads
- B. One shuttle
- C. One reed dent
- D. One bobbin

18. Which activity is part of workplace housekeeping?

- A. Leaving waste near the loom
- B. Cleaning the work area regularly
- C. Mixing damaged yarn with good yarn
- D. Blocking pathways

19. What is the main objective of quality control in weaving?

- A. Reduce worker attendance
- B. Ensure defect-free fabric production
- C. Increase noise levels
- D. Waste more yarn

20. Which skill is essential for a Jacquard handloom weaver?

- A. Attention to detail
- B. Pattern reading ability
- C. Machine handling skill
- D. All of the above
